

Twin Drum Rollers

Fully hydrostatic walk behind roller for maximum compaction force. No chain drive no exposed hoses.

Suitable for all applications available on asphalt and sub-base.

Feature PUSH STOP safety device easy to operate and manoeuvre in the tightest working conditions

Rollers

- Diesel electric start - reliable, easy start
- Low noise emission
- High compaction force 16kN
- Good water tank capacity 35 litres
- Extra heavy duty design for tough conditions - reavy duty protection frame and adjustable handles with safety stop button well positioned.
- Easy access for maintenance to hydraulic components and filter
- High speed gives good surface coverage, with simple forward reverse device for smooth operation
- Minimum width and limited overhang make the BWR excellent in tight conditions

Model	Power		Frequency (Hz / vpm)	Travel speed (m/min)	Force (kN)	Dimensions (mm)			Weight (kg)
	(hp)	(kW)				W	H	L
